Program offerend at MBS Summer School 2024

Module 1: Entrepreneurship and Innovation - Crowdfunding

June 24 - 28, 2024

This module concentrates on the supplying students with a deep understanding of the

theoretical foundations of entrepreneurship and practical tools to create ideas and start their own business in the digital age. Light is also shed on digital forms of entrepreneurship, especially crowdfunding and crowd interaction, competitive positioning and advantage in entrepreneurial firms, and strategic dimensions of recent developments in the market such as digitalization and their implications for new ventures, family firms, and business models.

Module 2: Artificial Intelligence in Business

July 01 - 05, 2024

Artificial intelligence (AI) is rapidly emerging as the most important and transformative digital technology of our time. Hence, it is important for future managers to understand this technology. Students will understand the different types of machine learning as fundamental concepts of AI plus they will be able to develop strategies of leverage AI for value creation in business settings and apply related tools and techniques. They will be aware of limitations, pitfalls and potential countermeasures when using AI.

Module 3: Designing Data-Driven Business Models

July 08 - 12, 2024

Despite an enormous amount of business-relevant data generated every day, many managers and top executives still rely on conventional wisdom or intuition to guide their decisions. In this course, participants will learn key principles of business analytics and recent technological developments that allows them to understand how to turn data into insights, better decisions, and enhanced corporate value. Participants will learn techniques they need to transform an organization into a data-driven organization and apply their knowledge by developing a suitable data-driven business model for a specific company.

Students' feedback

"The Mannheim Summer School module on Big Data was a perfect opportunity for me to get an overview of this current topic and learn how data analysis and machine learning techniques can be used in business and social enterprise."

Liudmilla Gormina, University of St. Gallen

"The MBS Online Summer School was a great experience. Firstly, what you will learn goes behind academic knowledge. Also, studying with people from the four corners of the earth is an excellent way to test your teamwork and communication skills. Lastly, the module about entrepreneurship was just amazing."

Quentin Vidal, Curtin University Australia

"The Big Data Module provided us with a clear understanding on what purposes Big Data and Machine Learning could achieve in reality. During the program, I experienced online cooperation with lots of brilliant people from different countries, that was amazing."

Haijuan Li, University of Sheffield
